2021 GMAS Performance

Fourth Grade
ELA & Math

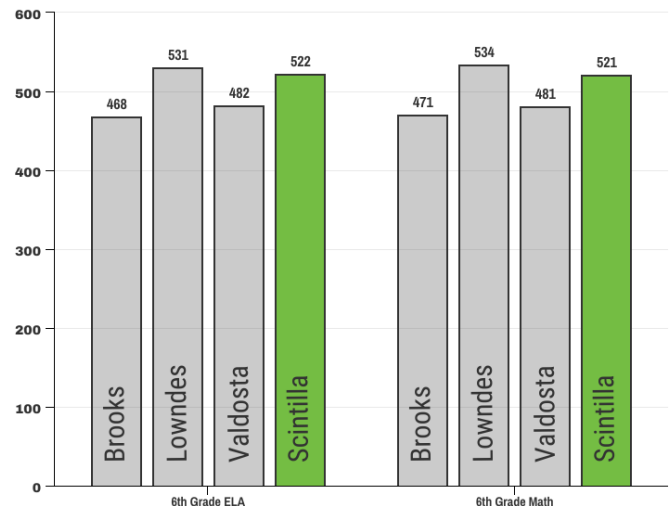

2021 GMAS Performance

Fifth Grade
ELA, Math, Science

2021 GMAS Performance

Sixth Grade
ELA & Math

The scores above are the 2021 GMAS Scale Scores. A scale score is a mathematical transformation of the total number of points earned (i.e., the raw score). Scale scores provide a uniform metric for interpreting and comparing scores within each grade level and content area. The mean is the arithmetic average of a set of scale scores. The mean scale score is found by adding all the scale scores in a given distribution and dividing that sum by the total number of scale scores.
